

ChitoNox™

ChitoNox seed treatment contains the active ingredient Fungal Chitosan, offering three modes of action to protect against soil-borne disease as well as free living nematodes while stimulating root and plant growth. A Pharma grade Fungal chitosan that delivers more consistent performance compared to crustacean based chitosan.

Approved for Use On

Corn and Soybeans

Directions for Use

Available as a support product, that can be added to our HomeStead Complete planter box offerings. Please consult the product label for more details.
