

Advanced Compatibility Foliar Nutrition

CropFit Iron 4 is a high efficiency foliar iron formulation that offers 4% iron with a spike of 2% sulfur. It is ideal for in-season nutrient applications on specialty crops and row crops.

Foliar feeding is one of the most efficient ways to supply nutrition to crops during critical growth stages. Applying nutrition to plant leaves allow the plant to immediately absorb nutrients, which promotes better plant uptake, better overall plant health and increased yield potential.

Features & Benefits

-  Provides high quality, readily available nutrients to plants in a highly efficient and mobile form
-  It is also formulated for superior tank mix compatibility with fungicides, insecticides, glyphosate and select dicamba herbicides
-  Superior tank mix compatibility over a broad pH range
-  Maximum nutrient mobility and efficiency, which allows for a lower application rate per acre
-  Low salt index and low impurities
-  Healthier plants, stress mitigation, enhanced quality and yield

Directions for Use

Optimum rate of application will vary depending on soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and general health. For best results, follow soil/tissue test recommendation.

Use Rate:

Field, Row and Vegetable Crops:
Apply 1 quart per acre per application throughout the growing season. More frequent applications at 1 pint per acre may be needed to correct deficiencies once they occur.

Other Considerations:

- Check chemical mixture compatibility using a jar test prior to application
- Recommended spray carriers: commercial liquid fertilizers, herbicides, fungicides, adjuvants and water
- Avoid freezing

Packaging:

Sold in 2x2.5 gallon jugs or a 250 gallon tote.

Recommended Crops

Corn, soybeans, wheat, edible beans, grain sorghum, sugar beets, potatoes and alfalfa

Active Ingredients

Sulfur (S).....	2.00%
Iron (Fe).....	4.00%

Derived from ferrous sulfate.
