

High Performance Biostimulant

CropFit SeaSurge is a premium biostimulant derived from *Ascophyllum nodosum*, a seaweed extract known for enhancing plant health and improving resilience under stressful conditions. The active compounds - mannitol, betaines, amino acids, and sugar derivatives - support a range of benefits that optimize plant performance, even in challenging environments.

Features & Benefits

-  Reduces the negative impact of drought, heat, cold and salinity stress, improving overall plant health and growth
-  Boosts chlorophyll synthesis and improves nutrient uptake for stronger plant
-  Utilizes powerful bioactive compounds to enhance plant resilience and stress tolerance

Directions for Use

Use Rate:

Foliar Applications

Field Crops, Row Crops, Vegetables and Small Fruit:

Apply 1-4 pts per acres in a minimum of 10 gallons of spray solution per acre for ground rigs and a minimum of 2.5 gallons of water per acre for aerial applications.

Soil Applications

May also be made and are best as a precision application in the root zone and may be made by drip, sprinkler or furrow irrigation systems or in band applications. For trees or individual plants, the product may be diluted as above or sprinkled directly on the soil uniformly under the plant's drip line, then watered.

Packaging:

Sold in 2x2.5 gallon jugs or a 250 gallon tote.

Recommended Crops

Multiple crops

Active Ingredients

Soluble Potash (K_2O)2.0%

*Derived from: Kelp Extract (*Ascophyllum nodosum* and Potassium Hydroxide*)*

** Potassium Hydroxide as an extraction agent*
