

Improve Nutrition

With reduced atmospheric sulfur, and higher crop yields it is important to ensure your crop gets the sulfur it needs. CropFit Sulfur 17 is a highly effective formulation designed to deliver foliar sulfur. Sulfur is a critical secondary nutrient in crop production. It is necessary to produce chlorophyll that supports photosynthesis to convert sunlight into energy. Sulfur is also essential component in amino acids and proteins.

Features & Benefits

-  Essential for chlorophyll production
-  Aids in protein and enzyme synthesis
-  Enhances nitrogen use efficiency
-  Ultimate tank mix partner
-  Maximum nutrient mobility and efficiency, allowing for a lower application rate per acre
-  Low salt index and low impurities

Directions for Use

Optimum rate of application will vary depending on soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and general health. For best results, follow soil/tissue test recommendation.

Use Rate:

Foliar

Apply 1/2-4 quarts per acre per application throughout the growing season. More frequent applications at 1-2 pints per acre may be needed to correct deficiencies once they occur.

Soil Applications

Field and Row Crops: 2-4 quarts per acre banded either as a stand alone or in combination with liquid NPK starter fertilizers at planting or as a side-dress during the season.

Packaging:

Sold in 2x2.5 gallon jugs or a 250 gallon tote.

Recommended Crops

Corn, soybeans, wheat, edible beans, grain sorghum, sugar beets, potatoes and alfalfa

Active Ingredients

Nitrogen (N)	8.0%
0.14% Urea nitrogen	
7.86% Ammonical nitrogen	
Sulfur (S)	17.0%
<i>Derived from Urea and Ammonium Thiosulfate.</i>
