

NFit

BELOW GROUND

One Product Solution to Reduce Nitrogen Losses Below Ground

Nitrogen is one of the costliest crop inputs. Regardless of how you are applying your Nitrogen – it is subject to potential losses due to many factors. The risk of this loss depends on the type of Nitrogen source being utilized, soil type, temperature, and management practices. NFit Below Ground is specifically formulated to improve nitrogen efficiency in a range of conditions and is for use with anhydrous ammonia, UAN solutions and liquid manure.

Features & Benefits

-  Formulated to help build soil biological activity
-  Non-toxic with no detrimental effects on soil bacteria and non-corrosive to equipment
-  Specifically formulated for UAN, anhydrous ammonia and liquid manure
-  Increases nitrogen efficiency, availability, and uptake
-  Up to four weeks of below ground protection from leaching
-  Reduces nitrogen loss below ground up to 47%
-  Non-corrosive calcium based polymer

Directions for Use

NFit Below Ground is intended to be used as a supplement to a regular fertilizer program and will not, by itself, provide all nutrients required by crops and other plants.

Use Rate:

- **Anhydrous Ammonia** – Use 6 oz. per 50 units of nitrogen – max rate of 24 oz.
- **Liquid Fertilizers** – Use 2 qts (64 oz.) per ton of UAN (28%, 30% or 32%)
- **Liquid Manures** – Use 24 oz. to 32 oz. per acre

Storage:

Store away from direct sunlight or ultraviolet light. Keep container tightly closed when not in use. Store in a dry place. Protect from atmospheric moisture. Avoid freezing.

Packaging:

Sold in 2x2.5 gallon jugs or a 250 gallon tote.

Recommended Crops

Row crops

Base Ingredients

Calcium.....	10.0%
Polyethylene Glycol, Copolymer	28.0%
Other Proprietary Ingredients.....	62.0%
Total	100.0%

Also Contains Non-Plant Food Ingredients

Carboxylic and Organic Acids
