FEATURES & BENEFITS

- Most convenient method to deliver a high-volume load of zinc to the furrow
- Generates massive root structure
- Increases early-season iron, manganese and zinc uptake
- Puts corn plants in the position to manage season-long stressors and optimize genetic potential
- Helps plants fix nitrogen and solubilize nutrients

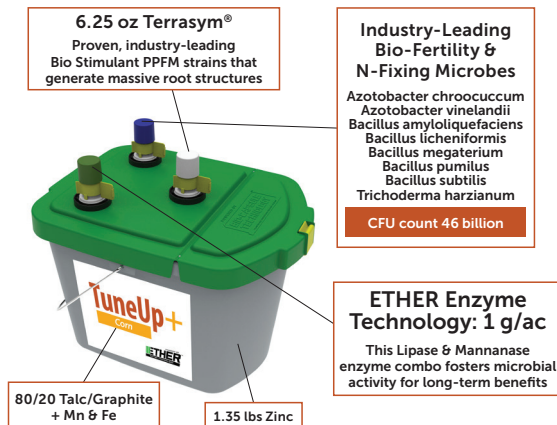

DIRECTIONS FOR USE

Remove the safety clips from the BIO-CAPSULES. Push down on the buttons atop the pail to activate the biologicals and release them into the base. Shake aggressively to blend. Do not activate BIO-CAPSULES until ready to use. If activated, apply and plant within 7-10 days for maximum performance.

Use Rate: The combined products treat 50 units of corn at 80k seeds per unit.

Storage: Store in a closed, dry area and in original container and keep sealed. Do not contaminate food, water or feed by storage or cleaning of equipment.

Packaging: Sold in a 2-pail case to treat 100 units of corn. Each pail is capable of treating 50 units of corn.
